○ a.) Two parachutes

○ b.) One parachute

○ c.) No parachutes

8. What is wingsuit flying?

○ a.) Skydiving with a wingsuit

○ b.) Swimming with a wingsuit

○ c.) Climbing with a wingsuit

9. When was the modern wingsuit developed?

○ a.) In the 1980s

○ b.) In the late 1990s

○ c.) In the 2000s

Transcript

hi today we are looking for five most extreme sports subscribe to the fact you channel not to miss new episodes number 5. cave diving it is underwater diving in water filled caves the equipment used varies depending on the circumstances and ranges from breath hold to surface supplied but almost all cave diving is done using scuba equipment despite all risks water filled caves attract scuba divers cavers and speleologists due to their often unexplored nature and present divers with a technical diving challenge underwater caves have a wide range of physical features and can contain fauna not found elsewhere number four street luging street luge is an extreme gravity-powered activity that involves riding a street luge board down a paved road or course street luge is also known as land luge or road luge like skateboarding street luge is often done for sport and for recreation street luge was born in southern california as downhill skateboarders found they could reach faster speeds by lying down on their skateboards this early form of the sport is now referred to as lay down skateboarding mike mcintyre set a world speed record in 2010. he went 164.12 kilometers per hour or 101.98 miles per hour at lil tim de sound number three free solo climbing free solo climbing or free soloing is a form of technical ice or rock climbing where the climbers climb alone without ropes harnesses or other protective equipment forcing them to rely entirely on their own individual preparation strength and skill free soloing is the most dangerous form of climbing and unlike bouldering free soloists climb above safe heights where a fall can very likely be fatal though many climbers have attempted free soloing it is considered a niche of a niche reserved for the sports elite which has led many practitioners to start them within both the media and the sport of rock climbing number 2 base jumping bass jumping is the recreational sport of jumping from fixed objects using a parachute to descend safely to the ground base is an acronym that stands for four categories of fixed objects from which one can jump buildings antenna spans or bridges and earth or cliffs participants exit from a fixed object such as a cliff and after an optional free-fall delay deploy a parachute to slow their descent and land in contrast to other forms of parachuting such as skydiving from airplanes base jumps are performed from fixed objects which are generally at much lower altitudes and base jumpers only carry one parachute base jumping is significantly more hazardous than other forms of parachuting and is widely considered to be one of the most dangerous extreme sports and finally number 1 wingsuit wingsuit flying is the sport of skydiving using a webbing sleeve jumpsuit called a wingsuit the modern wingsuit first developed in the late 1990s uses a pair of fabric membranes stretched flat between the arms and

flanks or thighs to imitate an airfoil and often also between the legs to function as a tail and allow some aerial steering the participant leaps either from a base or a helicopter and then free falls to their heart's content before deploying a parachute prior to landing [Music] subscribe to the fact you channel and watch more interesting videos
